RADIOFICATION LAGE TELEVISION PROGRAMS

TEILISI MADIO RECEPTION POOR -- Zarya Vostoka, No 125, 28 Jun 49

Zarya Vostoka often receives latters from citizens of Tbilisi complaining about the poor quality of reception in the radio rebroadcasting network. Two correspondents report that during the past 3 months they have not been able to hear programs regularly; the loudspeakers in their apartments often either are silent or give out unintelligible arounds. Others complain of the poor repair that the receiving units are given and state that the administration of the rebroadcasting network does not give the necessary attention to eliminating defecta.

TKVARCHELI TACKS LOUD SPEAKERS -- Zarya Vostoka, No 122, 24 Jun 49

Radio service from the two public radio reception and distribution systems (radiouzel) in Tavarcheli is limited by the lack of loud-speaker units in Thvarcheli stores. At present the systems have only about 1,000 subscribers. Loud-speaker walts are received in the stores in very limited quantities. It is also difficult to get spare parts for loud-speaker units.

KOLKHOZ RADIOFICATION LAGS IN LENIMGRAD OBLAST -- Leningradskaya Pravda, No 140, 16 Jun 49

The capacity of public radio reception and distribution systems in Leningrad Oblast now exceeds the prewar capacity. The Five-Year Plan for radiofication in Leningrad Oblast was completed on 1 January 1949. However, this plan is not being carried out satisfactorily.

In general, only rayon centers and 8 percent of kolkhozes in the oblast have been provided with radio facilities. Kolkhozes received only a few hundred of the 4,500 controllable loudspeakers installed in the oblast during the last 5 months.
